

Bereczki Nándor

Frontend Developer | React & TypeScript | Full-Stack Focus

nandmc@hotmail.com • linkedin.com/in/en-bee • github.com/nNBee

Professional Summary

Frontend Developer with 3+ years of professional experience building production web applications with React and TypeScript. Experienced in frontend architecture, REST API integration, authentication, automated testing, and collaborating with backend engineers on end-to-end features. Currently building hands-on backend experience with Node.js, Fastify, PostgreSQL, and relational database design to expand toward full-stack application development.

Experience

Frontend Developer

May 2023 – September 2026

Binary Birds Kft.

Remote

- Owned frontend development across multiple international client projects using React and TypeScript, from technical planning through implementation and delivery.
- Built and maintained responsive applications for learning management, document management, and administrative workflows, translating Figma designs into reusable UI components.
- Designed maintainable frontend architecture, state management, and routing, and contributed to shared tooling distributed through GitHub Packages.
- Integrated REST APIs and implemented authentication and authorization flows using OIDC and OAuth2.
- Collaborated closely with backend engineers to define API contracts and deliver end-to-end features.
- Worked with Vitest, React Testing Library, and Cypress, using GitHub Actions workflows to run automated tests and produce build artifacts.
- Refactored and optimized React applications using memoization and lazy loading.

Technical Skills

Frontend

React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Responsive Design

Backend & Data (Hands-on Projects)

Node.js, Fastify, PostgreSQL, SQL, Drizzle ORM

Application Architecture

Redux, React Context, React Router, TanStack Query

Testing & CI

Vitest, React Testing Library, Cypress, MSW, GitHub Actions

APIs & Authentication

REST APIs, OpenAPI, OIDC, OAuth2, Fetch API

Development

Git, GitHub, GitHub Packages, npm, pnpm, Vite, Docker

Additional

Figma, Express.js, Server-side Swift

Education & Professional Development

BSc in Labour Relations

University of Szeged

Transitioned into software development through self-directed study and professional experience.

Languages

Hungarian

Native

English

B2 – Professional Working Proficiency
